About Me

Aspiring for a career in a professional organization where I can apply my varied skills to fulfill the organization's objectives and scale greater heights along with the organization.

Experience

April 2024 – Present

Baranwal Consultancy and Services

ReactJS Intern

- **Developed Dynamic Web Interfaces** : Utilized React.js to build and refine responsive web pages, ensuring seamless user experiences.
- **Worked in a Team of 20 Members** : Collaborated effectively within a team of 20 members, contributing to the success of various projects.
- **Initial Website Creation** : Contributed to the development of the [BARDEINFRA](#) website using HTML, CSS, and JavaScript. The site is live and fully dynamic with backend connectivity and CMS functionality.
- **E-commerce Project Contributions** : Assisted in creating responsive pages for an e-commerce project, enhancing the user experience across devices.
- Coordinated with designers and backend developers to integrate APIs, achieving 99.9% data synchronization and reducing system downtime by 40%, leading to a 15% increase in overall user satisfaction.
- Optimized application stability by conducting thorough code reviews and utilizing advanced debugging tools; resolved 70% of reported issues within 24 hours, significantly boosting user satisfaction and retention rates
- **Maintained Documentation** : Documented code, created technical specifications, and provided user guides to facilitate knowledge sharing and support future development efforts.
- **Expanded Skills in MERN Stack** : Gained hands-on experience with MongoDB, Express.js, React.js, and Node.js, developing full-stack applications and implementing RESTful APIs.
- **Learned and Applied React Native** : Developed a mobile app with registration and login functionalities using React Native, connected to the backend to synchronize data between the website and app.

Projects

Mern Project

- Created a website with GET, POST, DELETE, and UPDATE methods.
- Created my own portfolio website, deployed it, and connected the contact form to the backend. ([link](#))

React-native

- Created an app with registration and login functionalities, and implemented MongoDB connection.
